

## PROJECT GOALS

- Evaluate the Atlanta – Chattanooga Corridor for possible implementation of a High Speed Ground Transportation System. The evaluation will be performed at a conceptual level, and will include an analysis of potential alignments, technologies, ridership, cost, economic impacts and methods of project financing
- Encourage Public Participation and Involvement in the project
- Select a Preferred Technology for the System
- Select a Preferred Alignment for the System
- Identify possible Station Locations
- Recommend potential project phases
- Evaluate potential environmental impacts of the system
